

## **Worksheet for The First Day of School: VERSION 2**

### **Prepare your child beforehand:**

Communication is the key that makes your child comfortable. Try to make things easier for your child. Tell him to socialize with his friends. Tell him the positive, fun and great things about learning and school.

### **Go and spend time:**

The initial days of school are extremely hard and difficult for the kids. Go and visit your child, try to make him understand that a school is a safe place for him and that he needs to make friends and socialize with his other class-fellows. Visit the school with your child before the first day of school. Visit the classroom during the trip. It will help your child feel comfortable with the school environment.

### **Give incentives:**

Reward your child, give him small incentives whenever he behaves nicely and act in a certain way that you want your child to behave.

### **Nice and motivating Lunchboxes:**

Make colorful, your child's favorite food and put it in a box. Make the lunchbox the highlight of the day. You could also send some treats for the other children too so that he/she shares it with his other class fellows which will eventually help him in making friends.

### **Pick up time:**

Pick up your child on time. Give him a hug and ask him about all the details of his first day of school.
